

# Nikhil Panchal

nikhilsp7405@gmail.com | +91-9510571046 | LinkedIn | GitHub | Portfolio

## Professional Summary

Motivated B.Tech Information Technology student with hands-on experience in Full Stack (MERN) Development, UI/UX Design. Proficient in React.js, JavaScript, Node.js, Express.js, MongoDB, Python, HTML, and CSS. Experienced in building responsive web applications, developing AI-based solutions, and deploying projects using Git and GitHub. Problem-solving skills with a passion for learning emerging technologies and contributing to innovative software development projects.

## Education

|                                                                                                          |                |
|----------------------------------------------------------------------------------------------------------|----------------|
| <b>Bachelor of Technology in Information Technology</b><br>Silver Oak University, Ahmedabad<br>CGPA: 8.7 | 2024 – Present |
| <b>LIBERTY SEC. &amp; HIGHER SEC. SCHOOL, Bhabhar (12th)</b><br>Percentage: 54.77%                       | Mar 2023       |
| <b>LIBERTY SEC. &amp; HIGHER SEC. SCHOOL, Bhabhar (10th)</b><br>Percentage: 63.50%                       | May 2021       |

## Technical Skills

- **Programming Languages:** C(Basic), Java(Basic), Python, JavaScript
- **Frontend Development:** HTML5, CSS3, Bootstrap, React.js
- **Backend Development:** Node.js, Express.js
- **Database:** MongoDB
- **UI/UX Design:** Responsive Design, User Interface Design, User Experience Design (Basic)
- **Tools:** Git, GitHub, VS Code
- **Concepts:** MERN Stack, REST APIs, Responsive Web Design

## Projects

|                                                                                                                                                                                                                                                                                                                                                        |                                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|
| <b>US Life – Internship Career Platform</b>                                                                                                                                                                                                                                                                                                            | <i>React.js, JavaScript, CSS</i>        |
| <ul style="list-style-type: none"><li>• Built a responsive career and internship platform with modern UI/UX design.</li><li>• Developed interactive pages, reusable React components, and mobile-friendly layouts.</li><li>• Improved user engagement through responsive design and optimized performance.</li></ul>                                   |                                         |
| <b>Deep Fake Image Detection</b>                                                                                                                                                                                                                                                                                                                       | <i>Python, TensorFlow, OpenCV</i>       |
| <ul style="list-style-type: none"><li>• Developed a deep learning model to detect manipulated images using Convolutional Neural Networks (CNNs).</li><li>• Implemented image preprocessing and model training using TensorFlow/PyTorch and OpenCV.</li><li>• Improved detection accuracy through dataset preparation and model optimization.</li></ul> |                                         |
| <b>Fraud Detection in Online Transactions(IBM SkillsBuild)</b>                                                                                                                                                                                                                                                                                         | <i>Python, Pandas, Scikit-learn</i>     |
| <ul style="list-style-type: none"><li>• Built a machine learning model to identify fraudulent financial transactions.</li><li>• Performed data preprocessing, feature engineering, and class balancing techniques.</li><li>• Implemented the solution using Python, Pandas, NumPy, and Scikit-learn.</li></ul>                                         |                                         |
| <b>Personal Portfolio Website</b>                                                                                                                                                                                                                                                                                                                      | <i>HTML, CSS, JavaScript, Bootstrap</i> |
| <ul style="list-style-type: none"><li>• Designed and developed a responsive portfolio website showcasing projects, certifications, and technical skills.</li><li>• Implemented modern UI/UX design with animations, interactive components, and smooth navigation.</li><li>• Deployed and maintained the website using GitHub Pages.</li></ul>         |                                         |
| <b>US Life Innovation – AirPods Website Clone</b>                                                                                                                                                                                                                                                                                                      | <i>HTML, CSS, JavaScript</i>            |
| <ul style="list-style-type: none"><li>• Built a responsive AirPods-inspired e-commerce website with modern UI design.</li><li>• Developed product showcase sections, navigation systems, and mobile-friendly layouts.</li><li>• Enhanced user experience through responsive design and interactive components.</li></ul>                               |                                         |

## Amazon Clone

*HTML, CSS, JavaScript*

- Built a responsive Amazon-inspired e-commerce website with product showcase and navigation features.
- Implemented modern UI components, responsive layouts, and interactive user experiences.
- Ensured cross-device compatibility through responsive design techniques.

## Experience

---

### AI Strategy and Business Intelligence Intern

Mar 2026 – Apr 2026

*IBM SkillsBuild*

- Applied AI and business intelligence concepts to solve real-world analytical problems.
- Developed machine learning solutions for fraud detection and data-driven decision making.
- Collaborated on project-based tasks involving data analysis and predictive modeling.

### Member

Feb 2025 – Dec 2025

*IEEE, Silver Oak University*

- Participated in technical workshops, seminars, and collaborative events.
- Enhanced technical knowledge in emerging technologies and teamwork.

## Achievements

---

- Completed AI Strategy and Business Intelligence Internship by IBM SkillsBuild.
- Earned Python certification from Kaggle and HackerRank.
- Built and deployed multiple web applications using React.js and JavaScript.

## Certifications

---

- AI Strategy and Business Intelligence Internship – IBM SkillsBuild (2026)
- Technology Job Simulation – Deloitte Forage
- Python Course – Kaggle
- Python (Basic) – HackerRank
- Introduction to SQL – Datacamp
